Resolution to declare support for Waller County Communities That Care

Whereas, Waller County endorses the Communities that Care (CTC) prevention program, as directed and proposed by Sam Arungwa, without any obligation or requirement by Waller County to pay for the CTC program;

Whereas CTC is one of the most effective, sustainable, and efficient (ESE) models for county governments to help "prevent and reduce juvenile crimes and problem behaviors" for decades;

Whereas this commissioners court was elected in part to help "prevent and reduce juvenile crimes and other social-economic problem behaviors"

Whereas, Be it resolved that the Waller County Commissioners Court supports the adoption of a Waller County Communities That Care (CTC), directed by Prof. Sam Arungwa, as it provides needed scientific resources that will significantly reduce and prevent the high costs of crime on our local property taxpayers. Waller County is committed to local social economic development, and this (CTC) model is consistent with our goals, in that it is effective, sustainable, and efficient:

Therefore, We resolve that by signing this resolution, we pledge to work together with Prof. Sam Arungwa, and all our CTC stakeholders, to help ensure that Waller County becomes the best County in Texas and America!

Signed this 16th day of July, 2014.
